

X-IT rescue sling

H41

Evacuation sling, can be configured as under arm or triangular support harness

Features:

- Dual configuration
- Wide size range
- Rapid deployment
- Compact stowage
- Wide chest and back support
- Large steel multi-directional attachment point
- Rear grab handle

Dual configuration allows use as both underarm lifting sling and traditional nappy under seat. Support can be reconfigured mid rescue, even whilst casualty is suspended.

Adjustable before or during use to a range of body sizes from large adult down to a child of 5 years.

Wrap around style permits fitting to casualty without the need to step in or through openings, minimising need to manipulate casualty.

Double action safety hook connectors and easy adjust buckles can be operated while rescuer is wearing gloves.

Entire harness packs away into under arm sling allowing rapid deployment to secure the casualty without twisting or tangling.

Wide PVC belt provides high level of casualty support.

Large attachment ring allows compatibility with complex rigging systems.

Rear grab handle improves manoeuvring of casualty.

Not designed or certified to arrest falls.
