

Work at Height Critical Injury Pack

UMA2

Portable kit for the treatment of severe / life threatening blood loss. Can be attached to harness for easy transport.

Harness portable design to complement your existing Work Place and Personal first aid kit provision in order to manage severe and life threatening blood loss.

A critical injury pack is now specified as part of the recommended first aid provision for all high risk environments under MATS First Aid For Working At Height Guidance (GN-009)

This BS8599-2:2019 Critical Injury Pack includes a number of items not usually found in standard first aid kits:

HypaCover Trauma Dressings - highly absorbent dressings which can soak up more blood than standard wound dressings.

Chito-SAM Haemostatic Dressings - work independently of the body's natural processes to clot blood fast.

SAM XT tourniquets - can be used to occlude bleeding blood vessels in limbs.

Casualty Record Card on waterproof / tear proof paper with double ended sharpie for prioritising casualty assessment & treatment and recording of incident / casualty details.

Contained in a robust nylon case with prominent and reflective external markings, zip around opening and a robust carry handle / attachment loop .

Contents are arranged in specific areas to facilitate easy selection and removal, and are well contained to prevent loss of contents when opening at height.

Bag size allows for content to be expanded or modified to suit specific work environment needs.
